Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

The region's passenger traffic grew 2.4% in the first half of 2011 despite a 9.2% increase in ticket prices. Growth benefited significantly from a strong 3.9% gain in the 2nd quarter, amplified because last year's growth was depressed by the Icelandic volcano, and expanded services into new destinations that culminated in 3.5% and 5.4% increases in domestic and international seats respectively. The region's cargo performance is mimicking the nation's and following global economic trends as YTD June cargo grew 2.6%, down from 6.3% in the 1st quarter.
