Aviation Department - Traffic Statistics

JoJo Quayson  
Santiago Grullon  
Jean Debrosse  
Tushar Japi

Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

The region's passenger traffic edged up 0.3 percent in the month of February, but the figure was suppressed by the extra day from 2016's leap year that added approximately 301,000 passengers to last year's total. Our airport system handled a record 8.762 million passengers – an improvement of 27,054 passengers compared to 2016. This modest gain was led entirely by a 0.9 percent gain in domestic passengers (an additional 52,252 travelers) as international traffic fell by 0.9 percent – down 25,199 passengers. Airlines cut seat capacity by 1.4 percent. Domestic seats inched down 0.8 percent and international seats fell 2.4 percent. The region's cargo activity continued its improvement trend in February with a solid 4.5 percent growth rate. Growth was led by the domestic sector's robust 9.5 percent increase. International freight activity grew at the modest rate of 1.9 percent.
