Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily)" refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Regional passenger traffic rose only 0.5 percent in July on a 1.1 percent capacity reduction. Domestic traffic fell 3.6 percent on a 4.5 percent seat reduction and rising yield, leaving little incentive for any near term spurt in capacity growth. International markets grew 8.5 percent on a 5.6 percent seat increase. ATA reported zero net passenger growth. Regional freight increased 20 percent –the same as the Y-T-D pace set through June. Domestic freight rose 4.3 percent, while international traffic grew 31.3 percent.
