Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized. "Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

With a growth rate of 1.6 percent, October registered the second weakest monthly percentage gain thus far this year. Nevertheless, it translated into another recordsetting month as the region's total passenger traffic reached 10.9 million passengers – a net gain of 172,960 travelers. Growth was led by the international sector, which grew by 3.4 percent and set a new mark of 3.8 million passengers. The domestic sector, too, set a record of 7.2 million passengers, despite expanding by a mere 0.7 percent. Airlines grew their seat capacity by 2.9 percent, with domestic and international seats increasing by 1.9 and 5.3 percent, respectively. Following two consecutive months of solid growth, the region's total cargo activity registered a relatively modest 2.3 percent increase. International freight recorded a 5.2. percent increase. Domestic cargo landed in negative territory for the fourth time in 2016 as it fell by 3.1 percent.
